MABROUK INITIATIVE : Background

- Almost 600,000 marriages per year in Egypt
- Marriage is the entry point for family health messages
- ~1.7 m births per year in Egypt
- Community and Mass Media Interventions delivered through the Private, Public and NGO sectors.
NGO/CDA Sector: CHL
Community Health Program

Program Coverage

- **133 Villages**
  (27 mother villages + 106 satellite)
- **650,000 Est. Population**

Program Structure

- CDA, Village Health Committee
  Leadership: Dawar & AWSO
Family Health Package
Pre Marital Interventions:
- Trained Mazoons (marriage registrars)
  - Mazoon / Priest Workshops (26 Mazoons from various Governorates)
- Counseling in health facilities

Newly Married Interventions:
- In-home visits conducted by volunteers in 120 villages
Antenatal and Post-Partum Care Program

Helps couples plan and manage their first pregnancy and represents the intersection of many health issues that will have lifelong effects on the health of the mother, child and ultimately the whole family.

Critical time to initiate family planning.

- Postpartum care and family planning offered in the same location.
Antenatal and Post-Partum Care Program

Activities:

- Antenatal classes including nutrition, breastfeeding, family planning, etc..
- In-home visits conducted by nurses and Raidat Refiat (Volunteers) from Primary Health Care units (10,000 per year)
- Distribution of Mabrouk book to women immediately after delivery

Mother: “Are we using it? We live by it!”
Post-Partum Care Program

• Inform women about location and services of local PHC
• Discuss family planning and encourage women to go to PHC and begin using FP method before 40th day
• Distribute IEC Materials - Mabrouk book to women immediately after delivery
MABROUK INITIATIVE: Recent Highlights
